PROFESSIONAL SUMMARY

Python & MERN Stack Developer with 1+ year of hands-on experience building robotics dashboards, geospatial systems, and scalable web applications at OttonomyIO. Proven track record delivering real-time data pipelines (6M+ records), Mapbox/GeoJSON integrations, and Android-compatible PWA/TWA solutions in production environments. Seeking a high-impact SDE role to contribute to complex engineering challenges.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), SQL, C++

Frameworks & Libraries: Django, Flask, React.js, Node.js, Express.js, Redux, Tailwind CSS

Databases: MongoDB (Time Series, Aggregations, GeoJSON), MySQL

DevOps & Tools: Docker, Git/GitHub, Postman, Azure, Android Studio, ADB, REST APIs

Other: Mapbox GL JS, GeoJSON, Raspberry Pi, WebSockets, SSL/TLS, PWA/TWA, Web Crawling, DSA

WORK EXPERIENCE

Software Development Engineer — OttonomyIO Pvt. Ltd., Noida, U.P

May 2024 – Present

- Built and maintained real-time fleet monitoring dashboards for robot analytics using React.js, MongoDB, and Node.js — enabling clients to track KPIs, performance trends, and uptime metrics
- Integrated Mapbox GL JS and GeoJSON for geospatial visualization of robot running states, improving UI responsiveness by 30%
- Engineered a MongoDB Time Series data pipeline processing 6M+ records, including geospatial distance estimation from GeoJSON polygon coordinates
- Developed PWA and TWA applications packaged as APKs using Android Studio, ADB, JWT, and SSL/TLS for seamless Android deployment on Ottonomy robots
- Enabled real-time robot-device communication using Raspberry Pi and WebSocket (WS/WSS) protocols for live telemetry and health diagnostics
- Containerized applications with Docker to streamline deployment and ensure consistent environments across teams
- Collaborated with cross-functional (backend, robotics, client) teams on RESTful API design, code reviews, and system optimization

PROJECTS

Robot Efficiency & Fleet Dashboard — OttonomyIO

Live: testnoc.ottonomy.io

- Developed 13-section React analytics dashboard with toggleable components (RobotTotalTimeSection, RunningStateStreetMapSection, etc.) and Mapbox-powered street map visualizations
- Built MongoDB aggregation pipelines with GPS and time-windowed segmentation for robot status analytics

Blogify — MERN Stack + REST APIs

Live Demo | GitHub

- Full-stack blogging platform with JWT authentication, CRUD operations, and fully responsive UI

Food Management System — Django + SQL + JavaScript

Live: sangam02.github.io/Foody.com

- Full-stack platform for menu management, order tracking, and a personalized recommendation engine based on user behavior

Web Crawling & Data Extraction — Python, BeautifulSoup, Regex

- Automated structured data extraction workflows, reducing manual processing time by over 80%

EDUCATION

MCA — Master of Computer Applications | Lakshmi Narain College of Technology, Bhopal, M.P | 2022 – 2024

B.Sc. (Math, Statistics & Computer Science) | Bundelkhand University, Jhansi, U.P | 2017 – 2020

CERTIFICATIONS

- Generative AI Foundations Certified — Microsoft Collaboration
- Cisco PCAP — Programming Essentials in Python
- Cisco — Introduction to Cybersecurity
- Udemy — Web Development, JavaScript, Django, MERN Full-Stack

ACHIEVEMENTS

- 5-Star Python Coder on HackerRank
- Represented State in Badminton Tournament
- Earned 3 Badges — Hacktoberfest
